

*Simple, Efficient and Effective Outsourcing*

## **Enterprise Content and Document Management**

The Rosetta Sourcing Limited Enterprise Content and Management Solution (ECM Solution) is a scalable, open document management, collaboration, workflow and imaging Solution. Based on the Alfresco solution, it supports a wide range of features and capabilities, delivering exceptional value for money through the utilisation of open, vendor neutral technologies. The RSL solution is available as either a fully packaged service offering (ie hardware, software, configuration and support) or alternatively as a standard application installation.

Used widely across government, military, corporate and SME's alike, Alfresco provides a radical alternative to the traditional ECM offerings. Available as either a "community" edition or as a licensed vendor supported version, Alfresco is capable of quick and simple integration into the corporate infrastructure, both at the desktop level and at an Application/Architecture level.

Rosetta Sourcing Limited provides packaged implementations of this unique product backed up with profession support services to give a real alternative to a wide range of business problems.

### **Key Features**

- Full range of ECM functionality with enterprise grade Document Management, Records Management and Imaging
- No user based licensing, no vendor lock in.
- Straight forward/clear pricing.
